Happy Holidays!!

With the holidays upon us and the New Year around the corner, we want to wish you and your family the best and safest holiday season!

As we head into our 5th year we will continue to provide the best the sea has to offer. During this time, we have not had a price increase even though the cost of providing this all natural product has increased.

While others offer a similar product at a much higher cost, they provide only a fraction of the Chitosan Oligosaccharide. With Chit-O-Power you receive up to three (3) times more of this powerful functional food!

Thank you for your dedication and faithfulness in using and sharing this product. It is our hope that we have added as much value to you and your family as you have to us.

Ken

A Gift for You!

As a special thanks to you, Chit-O-Power is offering an additional 5% discount off of your regular price. Just order any amount from your distributor between February 1st, 2005 and February 28th, 2005 to receive this . . .

EXTRA DISCOUNT!

Foot Loose and Fancy Free!

Hello, my name is Joyce. I am a Registered Nurse who has worked in the emergency room for the past 30 years. As you can imagine I am constantly on my feet. One year ago, I was diagnosed with Plantar Fasciitis and Tendonitis in my right foot. In layman's terms, this means severe inflammation in the heel and arch. It felt like a red-hot poker with an electrical shock while walking and sitting. Even when lying down the burning sensation was tremendous. Due to the pain, I altered my stride and this adversely affected the tendons in my knee. Due to my high sugar, I could not receive any steroid injections.

(continued next column)

(continued from previous column)

Neither could I take anti-inflammatory medications due to high blood pressure. The only medical recommendation was to buy a "good pair of shoes". I followed this advice and it helped some but not much.

I was introduced to chitosan oligosaccharide 6 months ago. Within two months, I began to walk and feel better. Now, I hardly notice my feet even while working a 12-hour shift!

Joyce Glenn, North Carolina

Champions are a Breed Apart

I have been grooming, training, competing in dog shows, and "match" judging for more than 30 years. Having worked with many breeds, one thing is always in common, genetic health problems. This is due to improper breeding practices over hundreds of years. Even though I have been very careful in my breeding practices, I still have been plagued with continued genetic health problems. A good example is the Pomeranian. Inherently, puppies deliver using the method of "C-Section" versus "free whelping". Typically, you only have two (2) puppies per litter. They can be born, with a "soft spot" at the top of the skull that will not close. Finally, they have a deficient immune system.

Because of this, I have always ensured a quality regimen of a healthy diet and nutritional supplements. The most important of these is Chit-O-Power.

Since using Chit-O-Power with this breed, I have had six (6) litters. All litters have delivered via "free whelping". Two of those litters have produced not two (2) but four (4) healthy puppies. All 12 of the puppies' were born with a closed skull! In addition, I have not experienced the immune deficiencies typical with this breed. In fact, I have trained & campaigned nine (9) of the "palms" thus far in competition. Of the nine, seven (7) are champions. One in particular, a black palm, won Best of Breed.

THREE CONVENIENT SIZES:

- 100 MG (30 CAPSULES / 3GRAMS)
- 250 MG (30 CAPSULES / 7.5 GRAMS)
- 500 MG (60 CAPSULES / 30 GRAMS)

(SEE YOUR DEALER FOR DETAILS)

(continued from the previous page)

This is the first time in 20 years that this occurred in Hawaii! The other two (2) are also well on their way to becoming champions! Chit-O-Power is one of my best breeding secrets. My dogs are healthy, happy and will always be my Champions!

Arlene Otaguro, Hawaii

Prospecting for Gold!

For men, reaching age 50 is not only the beginning of a new decade, but also a signal that it is time for your first colonoscopy. The doctor explained that this is necessary to screen for polyps and possibly colon cancer, which is the second most common cause of cancer death in the USA. This humbling experience is accomplished by inserting a camera in the colon (large intestine) and the doctor gets a recorded "picture" of this previously uncharted territory. If everything were OK then I would not need to repeat this procedure for another 5 years. If the doctor discovers polyps, they are removed, analyzed and this procedure would be repeated.

As a part of the deal, I suggested that if he "discovered gold" that we would split it, which he happily agreed.

At the conclusion of the examination, the doctor did indeed "discover gold". He was so impressed with the results, that he stated that I would not need to see him for **10** years, what a relief!

Until recently, my eating habits have not been that good. However, I have been faithful in taking nutritional supplements, especially Chit-O-Power. Having taken this product for more than 8 years, I firmly believe that this product has added to my overall health and well-being. In fact, prior to my colonoscopy, I had already "discovered gold" in this unique functional food

Still Going Strong

Hi, my name is Hazel Miller. I live in Hawaii. Even though it is "a paradise" because the sun is so close to the equator, the UV light can be very harmful.

In May of 1997 I found out I had Squamous Cell Carcinoma (skin cancer) and had the lesion removed surgically. I was told that I would have to have rechecks every 3 months. On my first recheck, the doctor found 7 new lesions on my arm and leg.

My best friend told me about Chitosan Oligosaccharide. It had helped her, so, I started taking it. At my next 3-month visit, I had no new lesions!

(continued from previous column)

Unfortunately, I ran out of the product for approximately 3 ½ months and when I went back for my recheck, they found 8 new lesions on all 4 limbs! I started back on Chitosan Oligosaccharide and had no new lesions.

It is now 7 years since I first contracted skin cancer. I have always had a busy lifestyle including working two jobs.

Using Chitosan Oligosaccharide has eliminated the lesions, allowed me to continue my hectic pace and all of my doctor reports are fine. I highly recommend this product to help your body's immune system remove toxins. I personally will never run out again!

The Fountain of Youth?!

Hi, my name is Al Watkins. My experience with chitosan oligosaccharide began almost 15 years ago. As with most people, I was skeptical, but I gave it a try.

Almost at once, I noticed that my energy level increased.

I was already retired and approximately 70 years old. I was trying to keep up a 15-acre mango farm and rebuild the farmhouse while still living in town (Kailua Kona, HI). I spent many hours on the tractor and the carpenter's workbench. I was getting tired by noon, having to quit and go back to town. After taking the chitosan oligosaccharide, I found I was able to "keep at it" all day.

In the process of rebuilding, I dropped a beam on my foot and broke 2 toes. The healing that took place was so fast that it surprised everyone. I was "back on the job" in a little over two weeks! For me, that was the "clincher", I have taken it ever since.

My wife, Vaye, also uses the product and had a most unusual experience. In 1953, she had contracted with hepatitis while we were stationed in Sidon, Lebanon. It affected her liver and she had to be very careful with her diet. After taking the product she found that, "she could join the human race" and enjoys a much more variety of foods, including "fatty foods".

Our general good health has stayed with us to this day. She is 80 and I am 84 and life is beautiful!!

For you, your family and your pets!
